PROFESSIONAL PROFILE

Motivated Bachelor of Applied Information Technology student specializing in software and web development, with practical experience building web and mobile applications, backend services, databases and user-focused digital solutions. Hands-on project experience with JavaScript, Node.js, React Native, Firebase, C#, PHP, HTML, CSS, SQL and database design. Comfortable working in Agile teams, using GitHub for version control, testing application functionality and solving technical problems. Seeking an IT/software development internship where I can contribute to real projects while developing industry experience.

TECHNICAL SKILLS

Programming:	JavaScript, C#, Python, PHP
Web Development:	HTML, CSS, responsive web development, APIs
Mobile & Backend:	React Native, Node.js, Express.js
Databases & Cloud:	Firebase, MySQL, MongoDB, SQL, database modelling, ERD design
Tools & Practices:	GitHub, Visual Studio, VS Code, Postman, Agile, software testing, debugging
Professional:	Problem-solving, teamwork, communication, time management, technical documentation

SELECTED SOFTWARE PROJECTS

Employee Clock In / Clock Out System JavaScript, Node.js, React Native, Firebase

- Developed a functional mobile attendance application designed for practical workplace use.
- Implemented secure employee login, clock-in/clock-out functionality, real-time attendance tracking and cloud data storage.
- Strengthened skills in mobile application development, backend development, database integration and user-focused interface design.

Student Reference Portal: Web Development, Database Design, GitHub, Agile

- Contributed to a database-driven educational resource web application with authentication, role-based permissions, search and CRUD functionality.
- Worked on ERD/database design, software testing and final-stage quality review; used GitHub, Trello and Microsoft Teams for collaborative development.

Bank Account Management System: C#, Object-Oriented Programming, Windows Forms

- Designed and prototyped a banking application using abstraction, inheritance, encapsulation, composition and overriding methods.
- Implemented account operations and business rules while separating application logic from the user interface.

EDUCATION

Bachelor of Applied Information Technology (Level 7) | Whitecliffe College, Auckland

2024, July – 2027, July

- Current focus includes software development, web development, advanced programming, databases, APIs, mobile applications and project-based development.

ADDITIONAL STRENGTHS

Strong interest in software engineering, digital innovation and practical business solutions. Able to learn new technologies quickly, communicate effectively with diverse teams and take responsibility for assigned work. Open to internship opportunities across software development, web development, mobile development, IT support and digital technology.
